

Resume — Maya Lin

Maya Lin — Full-Stack AI Engineer

Email: maya.lin@devstudio.io | **Phone:** +1 (555) 048-9120

Summary

Pragmatic AI Engineer with 4 years of experience building Python microservices and React dashboards. Expert in leveraging AI coding tools (Claude Code, Cursor) to rapidly build, debug, and maintain production freight applications. Strong focus on reliability and UI operator workflow.

Work Experience

AI Systems Engineer — FreightPulse Inc. (Mar 2024 – Present, 1.4 years)

- Built interactive operator dashboards in React.js connected to FastAPI backends for real-time shipment tracking and exception resolution.
- Directed AI coding assistants (Claude Code, Cursor) to accelerate backend feature generation, unit testing, and carrier API integration by 3x.
- Built OCR invoice processing pipeline using AWS Textract & Python, resolving carrier line-item discrepancies automatically.
- Served on-call rotation for production freight systems; maintained 99.9% uptime by resolving agent loop failures within minutes.

Software Engineer — LogiTech Logistics (Jun 2021 – Feb 2024, 2.7 years)

- Developed REST APIs with Python/FastAPI and MongoDB for carrier booking and rate calculation.
- Built vector search indexing pipeline (FAISS) to parse unstructured carrier rate cards.

Skills

Python, FastAPI, React.js, Next.js, Claude Code, Cursor, AI Prompting, MongoDB, RAG, AWS Textract (OCR), REST APIs, Docker, Git.

Education

B.S. Computer Engineering, UC Berkeley, 2021
